

HYDE PARK UTILITY
APPLICATION PROCESS

For continuity of electric service, the office must receive an application from both parties, the person moving out and the person moving in, with each party requesting the same stop/start dates. (1) If the event that we only receive a Stop Service Application, the electric meter will be read, service will be stopped/disconnected and a final electric bill sent to the moving customer. In that event, the facility will be without electric utility service until the Start Service - New Customer Application is received. (1)

(1) Service can usually be connected every day except weekends and business holidays. Service is usually available with two business days advance notice excluding new service requests requiring easements, installation or other construction work (installing poles/wires, digging, etc.). Unplanned outages and events may result in a delay in stopping service. You are responsible for usage until the service has been stopped.

Please send your application and other requirements to:

- customerservice@hydeparkvt.com
- Village of Hyde Park, P.O Box 400, Hyde Park, VT 05655
- Office Drop-Box: Insert when the office is closed.
